INTRODUCTION

UnityMeta Token is a prominent player in the Metaverse cryptocurrency realm, residing on the Binance Blockchain and adhering to the BEP-20 standard. This forward-thinking digital asset sets itself apart with a finite supply of 99,000 units and a standout feature: cross-chain compatibility. Its core focus revolves around fortifying transactional security within the Binance Smart Chain-based Blockchain system.

Dedicated to the principles of open-source decentralization, UnityMeta Token employs a proof of stake consensus mechanism. This meticulous design prioritizes decentralization, scalability, and user transactional privacy. UnityMeta Token has fostered a thriving ecosystem, encompassing a Launchpad, Swap Exchange, DeFi infrastructure, NFT Marketplace, Gamefi, Exchange, and other essential components. These elements synergize to enhance the UnityMeta Token Network's efficiency and functionality, with UnityMeta Token acting as its linchpin.

In essence, UnityMeta Token is a Metaverse cryptocurrency that embodies innovation and security. It thrives in an ecosystem carefully crafted to empower its users and shape the future of the Metaverse. With cross-chain compatibility, robust security, and an array of interconnected services, UnityMeta Token stands as a beacon in the ever-expanding world of digital assets, poised to lead the way in Metaverse evolution.

WHAT IS METaverse?

The metaverse represents a digital realm amalgamating elements from social media, online gaming, augmented reality (AR), virtual reality (VR), and cryptocurrencies, facilitating immersive virtual interactions. Augmented reality enriches real-world environments by superimposing digital visuals, sounds, and sensory inputs. In contrast, virtual reality entirely engulfs users in fictional realms, intensifying their sense of immersion. This dynamic convergence of technologies transcends traditional online experiences, fostering a multifaceted digital ecosystem where users can connect, socialize, work, and explore in unprecedented ways. The metaverse's potential extends beyond entertainment, impacting fields like education, commerce, and communication.

KEYTAKEAWAYS

- The metaverse is a shared virtual environment that people access via the Internet.
- Cryptocurrency is an aspect of the metaverse.
- Technologies like virtual reality (VR) and augmented reality (AR) are combined in the metaverse to create a sense of "virtual presence."
- Meta (formerly Facebook) CEO Mark Zuckerberg believes augmented reality glasses will eventually be as widespread as smartphones.
- In October 2021, Meta announced plans to create 10,000 new high-skilled jobs in the European Union (EU) to help shape the metaverse.²

WHY UMT IS A METaverse TOKEN?

- **Open:** You don't need to apply for anything or "open" an account. You just get access by creating a wallet.
- **Pseudonymous:** You don't need to provide your name, email address, or any personal information.
- **Flexible:** You can move your assets anywhere at any time, without asking for permission, waiting for long transfers to finish, and paying expensive fees.
- **Fast:** Interest Rates and rewards often update rapidly (as quickly as every 15 seconds), and can be significantly higher than traditional Wall Street.

Transparent: Everyone involved can see the full set of transactions

HOW DOES THE METaverse WORK?

An exact definition of the metaverse may be hard to explain because of its depths, but most technology experts agree, that the metaverse is a vast network where individuals via their avatars can interact socially and professionally, invest in currency, take classes, work, and travel in 3-D virtual reality

MISSION

- To try on unlocking UnityMeta Token potential and making UnityMeta Token easy to use.
- To make UnityMeta Token market place with global reach. To provide attention to the financial profits and safety of every single stakeholder.
- To facilitate the ability of buyer-seller to transact a wallet in the most secure way.

VISION

- To create a global UnityMeta Token marketplace where buyers and sellers can buy, sell and trade UnityMeta Token in most secured and trusted manner.
- To solve current problems of customers in a manner that make their business easier.

CORE VALUES

Be Magical. We are positive and kind above all else. Our main goal is to create happiness in other lives. Be Charitable We strive to be as giving as we can possibly be, helping out our community as much as we can. Be Sustainable We make decisions that are based on our long term health, not the short term gain. Be Transparent We strive to be open and honest with our community at all times, for the benefit of all.

ECOSYSTEM

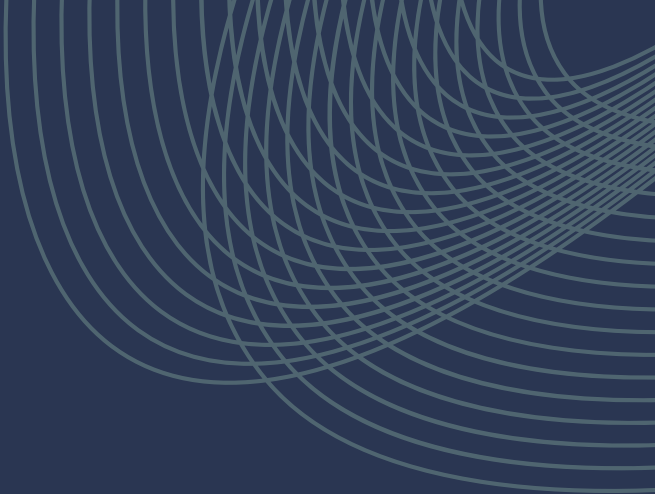

UnityMeta Token is a company that aims to bring innovation and novelty to the gaming, defi, utilities, nft, sports, forex and crypto trading sector through its Blockchain technology. The ecosystem of UnityMeta Token is very vast and broader as it is embedded with bsc that makes it more essential for the people associated with the agriculture and food sector.

BINANCE BLOCKCHAIN TECHNOLOGY

A decentralized open-source Blockchain-based operating system with smart contract capability, proof-of-stake principles for its consensus process, and a cryptocurrency unique to the system, known as Binance is a decentralized, open-source Blockchain-based operating system (BSC).

WORKING OF BINANCE SMART CHAIN

Binance is founded on a few essential concepts, the most important of which is decentralization. All data on the Blockchain is completely unfettered and is not under the jurisdiction of a central authority. Content creators can receive Binance in return for sharing their work.

Additionally, developers can create their own Tokens on the Binance network. These tokens can then be used in the network's user created decentralized apps (dApps). Binance main token is used to back the newly issued tokens. The network's ultimate step of development is to support Binance -based games. These games would be totally decentralized, with users rewarding authors directly if they enjoyed the game. Binance's consensus algorithm is referred to as delegated proof-of stake. In this system, transactions are authenticated by 27 super representatives who are responsible for keeping the transaction history. Super representatives are picked every six hours and compensated with a Binance Token created by the system. Every three seconds, a new block is added to the Binance Blockchain.

BENEFITS OF BINANCE BLOCKCHAIN

Transactions on the Binance Blockchain technology at Very Less Cost. Binance does not impose a fee for asset transfers. It assists sellers and buyers through its free transactions, promotes, and provides the optimal business environment. Rapid transactions The network can handle up to 2000 transactions per second. Scalability and the potential to revolutionize online media are encouraged by such transactional capacity.

This is a major accomplishment compared to Ethereum (25 transactions) or BitToken (3-6 transactions). Creates dApps On the network, you can create dApps. You can earn digital assets by creating a dApp on the network and offering content on it. These can be in regular Binance you created Binance backs that. As a result, you may be compensated for your efforts in developing the app and its content. If you don't want to create your own dApps, you can still browse through the vast collection already created.

SUPPORTS CREATORS

Binance believes it is essential to support content owners more effectively, and a network is an amazing option. If you're a 2020 internet user, chances are you enjoy having to read digital content. Because content creators enable you to be happy while watching, it is only fair that they are compensated fairly for their efforts

ANONYMOUS TRANSACTION

Transactions on the Binance network are anonymous, but only on the network itself. The act of purchasing BNB and the requirement of using an exchange means that you will have to prove your identity to purchase Binance tokens in the first place. Transactions can, however, be carried out anonymously once on the network. On the other hand, it should be noted that all Blockchain keep a record of all transactions that take place on the chain. As a result, no transaction can ever be truly anonymous.

SAFE

UnityMeta Token has a solid reputation in the cryptocurrency world. The amount of money spent by the company on security and the personnel it has hired demonstrates this. As with other cryptocurrencies, because it is a decentralized network, the individual bears a significant responsibility for safeguarding their tokens. In terms of the network as a whole, there has yet to be a security breach.

PROOF OF STAKE

Seeing as cryptocurrencies are decentralized and not controlled by banks, they require a way to verify transactions. Proof of stake is a popular method (PoS). Proof of stake is a consensus mechanism for cryptocurrencies. By staking their Tokens, cryptocurrency owners can check new transactions and add them to the Blockchain. This method replaces proof of work, the first cryptocurrency consensus mechanism. Proof of stake has grown in popularity as concerns about the environmental impact of crypto mining have grown. Proof of stake is critical for cryptocurrency investors. These are some examples of cryptocurrencies that use it. Owners of a cryptocurrency can stake Tokens and create their own validator nodes using the proof-of-stake model. Staking is the act of pledging your Tokens to be used for transaction verification. They are locked while you stake your Tokens, but you can unstack them if you want to trade them. When a block of transactions is ready to be processed, the proof-of stake protocol for the cryptocurrency selects a validator node to review the block. The validator verifies the accuracy of the block's transactions. If this is the case, they add the block to the Blockchain and receive cryptocurrency as a reward for their efforts.

WHY UNITYMETA TOKEN ?

- Zero Human Factor :- The human factor is not taken into consideration. The smart contract is not dependent on anyone, and there is no way to prevent the platform from functioning.
- Referral Provides :- There are no hidden fees, and all funds are transferred between members without any intermediaries. The contract balance is always a negative number.
- Immutability of Conditions :- Nobody has the authority to ban you from the platform because the contract does not contain a provision for such a restriction.
- Decentralization :- Instead of having managers or administrators in charge, there are only creators who are members of the community on the platform, just like everyone else.
- Instant Transactions :- Profits earned by other members are transferred directly into your personal wallet. There is no hoarding in the system, and all of your earnings are yours to keep.
- Transparency and Anonymity ;:- Because the smart contract code is public, anyone can view the complete history of all transactions. This ensures that the conditions are pure and that the platform statistics are accurate.

CHARITY

Blockchain technology has the potential to revolutionize digital fundraising for charitable organizations. It offers a secure, transparent, and global platform for receiving contributions, eliminating the need for costly currency exchange commissions. Through the implementation of blockchain-based solutions, charities can optimize their fundraising efforts and ensure that donations are handled with utmost security and transparency. One notable example of this innovation is the UnityMeta Token platform, where charitable donations are not only accepted but also processed securely and transparently. This technology ensures that every contribution benefits its intended recipients while minimizing the risk of fraud or mismanagement. Donors can have confidence that their funds are being used effectively, and charities can streamline their operations, reducing administrative costs. In summary, the integration of blockchain into digital fundraising holds the promise of making charitable giving more efficient, trustworthy, and accessible on a global scale, ultimately benefiting both donors and the causes they support.

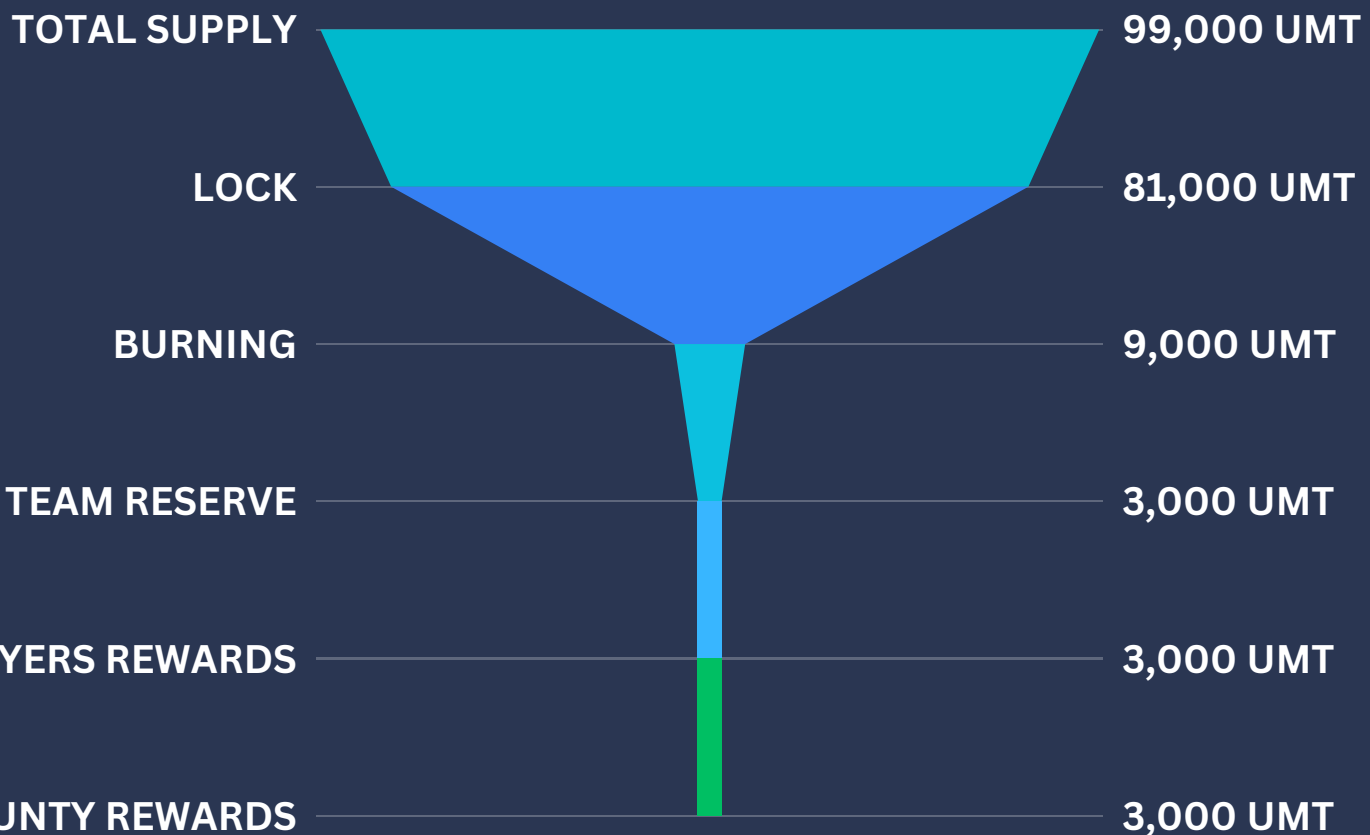

BONUS

You can earn money in UnityMeta Token by opening new accounts with certain financial institutions and participating in the digital token-based economy supported by bonuses. These bonuses will not end here; instead, you will be able to earn from various other offers based on your investment and profit.

ALLOCATION OF UNITY META TOKEN

CONDITIONS

NAME	UNITY META TOKEN
SHORT NAME	UMT
MAXIMUM SUPPLY	99000
TECHNOLOGY STACK	BEP-20

ROADMAP

Oct 2022

Project Announced

Nov 2022

Token Launch On Bsc Blockchain | Token Listed On Pancakeswap |Token Sale Starts From Pancakeswap

DEC 2022 -January 2023

Listing On CoinMarket Cap & Coingecko | Ownership Renounced To Null Adress

March 2023

Listing On Under Top 30 Rank Exchange (CEX)

June 2023

10000 NFT Announcement & Website Launch

September 2023

NFT Live For Sale | Stake & More

December 2023

Decentralized Wallet Test Net Live

Feb 2024

Decentralized Wallet Live & Launch Event

June 2024

Gaming Website Launch & International Launch Event

Nov 2024

Global Launch , More Than 30+ Country

WHAT IS DECENTRALIZATION ?

DeFi is a collective term for financial products and services that are accessible to anyone who can use Ethereum - anyone with an internet connection. With DeFi, the markets are always open and there are no centralized authorities who can block payments or deny you access to anything. Services that were previously slow and at risk of human error are automatic and safer now that they're handled by code that anyone can inspect and scrutinize. • A global, open alternative to the current financial system. • Products that let you borrow, save, invest, trade, and more. • Based on open-source technology that anyone can program with.

SMART CONTRACT

Binance Blockchain was designed to streamline communications. It ensures easy integration with a wide range of highly sophisticated programming languages. Binance is designed as a three-layered system. It consists of a core layer, storage layer, and application layer. Interestingly, each layer is optimized to perform a certain set of functions for a specific set of functionalities. It is the core layer that oversees the management of Binance smart contracts. Decentralized Finance or DeFi has emerged as the next-big-thing in the world. It has the potential to deliver better results to every single if implemented correctly.

INITIAL TOKEN OFFERING (ICO)

Initial Token Offering has become one of those Blockchain development services that needs no introduction. What started with a sea-full of doubts has now become one of the most preferred modes of raising funds in the present time. ICO has emerged as a boon for every entrepreneur in the last few years. With this far-reaching fund-raising program, you are able to materialize your business dream in the easiest manner. However, to achieve success using this means is easier said than done. UnityMeta Token accelerates growth of start-up companies by offering tools and services that save both time and resources.

UNITYMETA TOKEN PARTNER – AIRDROP'S

UnityMeta Token project is a Blockchain-based payment project that focuses on making reward points a commonly used as digital currency by improving the current reward points system in India, through Blockchain technology and tokenization. Although the reward points system is efficient in its current form, corporations have risks, a lack of transparency and security concerns with their centralized system for issuing and operating reward points. UnityMeta Token Airdrop Goals

DISTRIBUTION OF TOKENS

UnityMeta Token projects focus on tokens as a means to build network effects and help govern the network. The token sale is simply a bonus that can be used to facilitate distribution and raise money. It clearly states how many assets purchasers can get at each distribution stage. More details on how to design a token distribution block will be provided in the next section of the article. We are a sustainable and decentralized project that distributes wealth where it needs to be. Some % of each transaction is automatically sent to a charity picked by the community of UnityMeta Token.

- Total Supply-99000
- Lock - 81000 UMT
- Burning -9000 UMT
- Team Reserve - 3000 UMT
- Pro Players Rewards - 3000 UMT
- Bounty Rewards- 3000 UMT

WALLET LISTING PROCESS

UnityMeta Token Wallets are very similar to our mobile wallets where we store our money and do transactions from that. While in Ubit Token wallet we hold Ubit Tokens and other cryptocurrencies. A Ubit Token wallet is a software application that allows you to store and keep track of your Ubit Tokens. A Ubit Token wallet differs from a traditional wallet in that it holds Ubit Token private keys.

METAMASK

Trust Wallet

METHODS OF PAYMENT

This is a list of some of the top cryptocurrency gateways available in the market that accept Ubit Token and alt Tokens as payment. Apart from UbitToken payment processing, some of the major currencies that these crypto payment processors can help merchants accept include Ethereum, Ripple, LiteToken, etc.

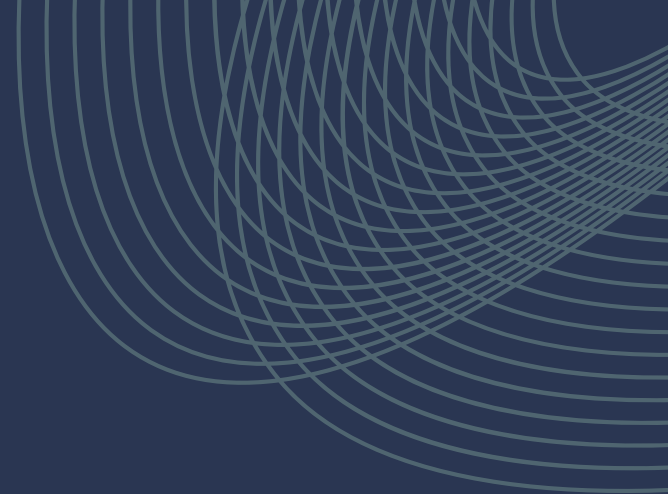

- UNITYMETA TOKEN
- BINANCE TRON (TRX)
- USDT (TRC-20)
- DEBIT / CREDIT CARDS

UNITYMETA TOKEN IN ECOMMERCE MARKETPLACE

UNITYMETA TOKEN NETWORK

UnityMeta Token Global Network -UnityMeta Token an experienced organic product ecommerce company. It provides delivery service of fresh vegetables and fruits to the customers at their doorsteps by procuring all the produce from farmer's market every morning. This makes sure that customers get fresh produce every time they order. Procuring directly from farmer's market also reduces any intermediate costs and ensures best quality. The advantages of organic food are more based on perception than real facts. Much of this support of organic food as a healthier alternative comes from environmental groups who want to conserve the environment by avoiding pesticides and fertilizers. The producers of organic food strongly believe in the idea that organic food is superior to other types. The organic ecommerce platform UnityMeta Token Network is being strengthened for directly linking farmers with retail as well as bulk buyers Interest in cryptocurrency is growing, and fast. With some pretty major brands, marketplaces and payment processors announcing their adoption of crypto, this digital payment method is firmly on the radars of retailers across the globe. Whilst not everyone thinks the world is ready for cryptocurrency payments, it's certainly getting harder to ignore the impact that crypto and the Blockchain technology on which it's built could have on ecommerce.

Whether you're an ecommerce merchant just dipping your toes into the cryptocurrency waters, or you're sold on the idea of crypto payments and are exploring how to accept them in your online store, it's important to keep on top of how this trend is unfolding. After all, awareness and understanding today could help forge a valuable opportunity for your business in the future.

UNITYMETA TOKEN - E LEARNING PLATFORM

E learning platform for farmers whom so member of UnityMeta Token Global Network -UnityMeta Token, Free access of e-learning system is available to any one interested in the field of agriculture and allied sciences. UnityMeta Token LMS is a platform that seeks to spread marketing information from experts and will build an educational marketing platform. The educational platform will be available to only UnityMeta Token LMS holders who can access content on tips and tricks from marketing experts. Digital Agricultural Learning UnityMeta Token LMS are innovations that enable farmers and agribusiness entrepreneurs to leapfrog to increase their productivity, efficiency, and competitiveness, facilitate access to markets, improve nutritional outcomes and enhance resilience to climate change. These technologies range from mobile apps to digital identities for farmers to solar applications for agriculture to portable agriculture devices. DATs are increasingly becoming indispensable in the global food and agriculture sector, from fast and convenient information delivery to providing virtual marketplaces

UNITYMETA TOKEN IN ONLINE GAME

UnityMeta Token Gaming is an exciting online gaming platform set to be launched by the dedicated team at UnityMeta Token's global network. This platform represents the cutting edge of gaming innovation, as it seamlessly integrates cryptocurrency technology into the gaming experience. These crypto games are a new breed of video games that operate on cryptocurrency networks, incorporating fully or partially decentralized ledger systems. This innovation empowers players with verifiable ownership of the virtual assets and items they acquire within these games. Online gaming, in particular, has emerged as a fertile ground for groundbreaking developments in the realm of cryptocurrency-based gaming. Developers are continually pioneering novel ways to utilize crypto, allowing players to purchase, trade, and engage with in-game items, cosmetics, unlockable characters, and much more. This convergence of the virtual and real worlds, which we affectionately refer to as our metaverse, is now more captivating than ever. UnityMeta Token Gaming offers a glimpse into the future of gaming, where players have unprecedented control over their virtual possessions, fostering a sense of ownership and value within the gaming ecosystem. As the gaming industry continues to evolve, UnityMeta Token Gaming stands at the forefront, exemplifying the limitless possibilities that arise from merging cryptocurrency technology with the world of online gaming. It's a thrilling adventure that promises to redefine how we play and engage in the metaverse, making it an exciting prospect for gamers and crypto enthusiasts alike.

OUR TEAM

Safety is of utmost importance in every industry as it can significantly impact a business's well-being and performance. Companies must take proactive measures to ensure the security of their files and their employees' accounts, especially when dealing with valuable clients. To address these safety concerns comprehensively, UnityMeta Token intends to hire experienced professionals well-versed in business safety practices.

By enlisting the expertise of these professionals, users can easily find solutions to their safety-related issues, relieving them of data security worries. This data encompasses company work and employee activities, often containing sensitive client information. Mishandling such data can tarnish a company's reputation. UnityMeta Token offers a secure, swift, mobile-based, digital, and decentralized solution right at your fingertips.

This solution guarantees convenient access to your accounts while serving as a reliable medium for decentralized payments. Notably, it provides users with a global and competitive money transfer system capable of facilitating the exchange of both FIAT currencies and cryptocurrencies. UnityMeta Token is a cryptocurrency that rewards users for various transactions in all aspects of life, making it an ideal candidate for widespread adoption in the world of cryptocurrency.

In summary, everything outlined in this whitepaper underscores UnityMeta Token's status as a trustworthy and secure decentralized currency and financial ecosystem poised for a global launch.
